

- 1) install the **HTTParty** gem in Ruby, follow these steps:
 - Open your terminal.
 - Run the following command to install the gem: **gem install httparty**
- 2) After installation, Use HTTParty in your Ruby scripts by requiring it:
Example:

```
require 'httparty'
response = HTTParty.get('http://..... ')

puts response.body
puts response.code
puts response.message
puts response.headers.inspect

response = HTTParty.post('http://..... ')
```
